

COVID-19 Visitation Guidelines for Nursing Facilities During an Outbreak Flowchart

Staff or Resident tests positive for COVID-19

- Suspend all indoor visitation except compassionate care.
- Immediately begin facility-wide outbreak testing.
- Place all residents on quarantine with transmission-based precautions.
- Contact your HAI POC or email hai@utah.gov.

Testing reveals no additional cases.

Testing reveals new cases only in the same area or unit as the original case.

Testing reveals one or more additional cases in other areas of the facility.

Any areas or units impacted by the initial case continue to quarantine, regardless of vaccination status.

Remaining units are released from quarantine and may resume regular visitation. All units must continue to participate in outbreak testing as required by CMS.

All residents remain on quarantine, regardless of vaccination status. Compassionate care and outdoor visits only until outbreak testing is discontinued.
