

Why should visitors to long-term care facilities get the COVID-19 vaccine?

Protect your loved ones

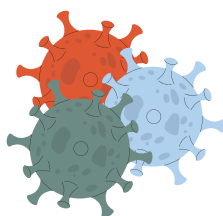

Getting vaccinated protects you and your loved ones from severe illness, hospitalization, and death from COVID-19.

Increase your loved one's quality of life

Residents exposed to COVID-19 are required to quarantine, even if they are vaccinated. Visitors who choose to get vaccinated help prevent exposures and COVID-19 outbreaks from occurring in facilities. This means your loved ones get to enjoy more of the activities they love:

- Visitation
- Community dining
- Facility activities

Slow the spread of COVID-19 variants

COVID-19 vaccines provide protection against the new variant strains of COVID-19.

Ask!

- Ask about the staff vaccination rate.
- Hable con la administración sobre los planes para mejorar la tasa de vacunación del personal.
