

Everyone 5 years and older can get a **FREE COVID-19 vaccine right now!**

COVID-19 vaccines are safe and effective.

COVID-19 vaccines help us get our lives back. The benefits of getting vaccinated far outweigh the risks of getting the virus. Most people only get mild or moderate side effects, like a sore arm. The vaccines are very effective at preventing severe illness, hospitalization, and death from COVID-19.

To find a vaccine provider near you, visit vaccinefinder.org. You can register for an appointment online or by phone. Some vaccination clinics will accept walk-ins or on-site registration. **Appointments may fill up quickly. It may take a few tries to get an appointment.**

- **The vaccine is FREE for everyone.** You DON'T have to have health insurance, be a US citizen or resident, or have a social security number. Vaccine providers don't give any of your information to immigration or law enforcement.
- You have to bring something with you that has your name on it (like a photo ID, utility bill, or a signed letter from someone saying you are who you say you are).
- If you don't have a computer or Internet access, ask someone you trust to help you register for an appointment.
- You may want to let the vaccine provider know ahead of time if you will need accommodations (such as language assistance or a wheelchair).

If you have questions about the COVID-19 vaccine, visit coronavirus.utah.gov/vaccine or call the COVID-19 Hotline at **385-273-7878**.
