### Personal Services
(including barbers, cosmetologists, body artists, nail technicians, massage therapists, tanning, etc.)

Utah’s Low Risk Phase Guidelines

#### Industry open under strict hygiene protocols. Service provider and customer wear face coverings.
Meticulous monitoring of symptoms.

- Follow all employer guidelines (see below)
- Both service provider and client wear face coverings. Exception given for clients when mask interferes with service
- Symptom checking (checklist or verbal), including temperature checks when feasible, of all staff at the beginning of each shift, with a log that can be made available for inspection by health department
- Screen clients upon entering the facility with a questionnaire asking about symptoms, travel, and any sicknesses in the home
- Procedure/service area surfaces are disinfected between each client
- Appointments scheduled with enough time allowed to disinfect all procedure surfaces between services
- Service provider maintains log of appointments with customer contact information to assist with contact tracing efforts
- When services are not being directly provided, 6 feet of physical distance must be maintained. This includes in waiting areas and between clients at all times
- Contactless payment encouraged; financial equipment disinfected after each transaction

#### General employer guidelines

Employers encourage flexible working arrangements (rotating shifts, remote work, etc.). Comply with distancing guidelines. Increased cleaning regimen of high-touch areas. Monitor employees for symptoms and well-being.

- All businesses operational if they can meet and adhere to all guidelines
- Employers take reasonable precautions
- Provide accommodations to higher-risk employees; minimize face-to-face contact, assign tasks that allow these individuals to maintain a 6-foot distance from other employees or customers, implement flexible work hours or staggered shifts, allow higher-risk individuals to work remotely

---

**Moving to yellow**

A color-coded health guidance system has been developed by the State of Utah to guide health behaviors for individuals and businesses. Each level of the dial is guided by a rigorous measurement system which can be different by each region, county, city, or community.
• Symptom* checking in business interactions
• Face coverings worn in settings where other physical distancing measures are difficult to maintain; ensure that face coverings are available
• Encourage remote work when possible; employers exercise discretion with returning to onsite work
• Workplaces comply with distancing and hygiene guidelines
• Limit unnecessary travel
• Require employees to self-quarantine when returning from higher-risk** areas
• Employers evaluate workforce strategy and concerns and enact strategies to minimize economic impact
• Employers must not allow any individuals under isolation or quarantine to come to work at any time unless authorized by LHD

* Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains; refer to CDC symptoms list for updated details https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html
